Personal

Misses Louise and Elizabeth Rucker have returned to Columbia after spending several weeks with their grandmother, Mrs. J. H. Rucker.

J. T. Robertson and W. S. Mauldin of the Brushy Creek section were in the city yesterday.

J. LeRoy Smith of Pelzer was among the visitors to spend yesterday in the city.

J. M. Long and E. F. Allgood of Brushy Creek, were in Anderson yesterday.

Henry Martin of the Walker-McElmoyle section was in the city yesterday.

Robert Moorhead of Concord was among the visitors to spend yesterday in the city.

S. M. Wilson of the Brushy Creek section was in the city yesterday.

J. E. Garrison and J. A. Garrison of Sandy Springs were in the city yesterday.

Ed McAllister of Pelzer was among the visitors to spend yesterday in the city.

Mr. and Mrs. B. H. Hodges of Starr were in the city yesterday for a few hours.

J. W. Campbell and John McDonald of the Fair Play section, were in the city yesterday.

James R. Anderson, a well known Anderson planter, was in the city yesterday.

Forster Brown of Anderson, P. F. D., was in the city yesterday on business. J. E. Eldred of Belton, Route 3, was in the city yesterday on business.

Dr. R. G. Witherspoon of the Roberts section was in the city yesterday on business.

Mrs. LaTour of Greenwood has arrived in the city for a visit to her daughter, Mrs. Ashley Briggs.

J. A. Crosby, train master of the Piedmont & Northern line with offices in Greenville, was in Anderson yesterday.

R. B. Blackwell of Iva was among the visitors to spend yesterday in the city.

Mrs. M. E. Martin of the Hopewell section was shopping in Anderson yesterday.

D. A. Geer of Belton spent part of yesterday in the city on business.

F. S. Prince of the Carwell Institute section was in the city yesterday on business.

Leon Richardson will be among the Anderson boys to go to Clemson College this year.

Capt. G. W. Sullivan of Williamsport spent yesterday in the city on business.

Miss Una Pettigrew of Iva was shopping in the city yesterday.

Swilen McFall and J. F. Watson, progressive Anderson planters, were in the city yesterday.

W. C. King of Townville spent a few hours in the city yesterday on business.

Den Smith of Anderson, R. F. D., was in the city yesterday.

F. W. Lyon of Carwell Institute spent a few hours in the city yesterday.

W. P. Pettigrew of Iva was among the visitors to spend yesterday in Anderson.

J. A. Cely of the Brushy Creek section spent yesterday in the city.

S. M. Orr, Jr., of Hordmont, Ga., was among the visitors to spend yesterday in the city.

Miss Annie Chapman has returned from Waynesville, N. C., where she has been visiting friends.

Mrs. John R. Crawford of Salisbury, N. C., has arrived in the city or a visit to Mrs. W. A. Chapman.

George Wrigley of Greenville spent a few hours in the city yesterday on business.

Miss Annie Burgess, who has been residing the last month at her old home, New Haven, Conn., has returned to the city.

Mrs. Frank Sloan is spending a week in Atlanta where she is the guest of friends.

Mrs. Andrew Spear and children, Mrs. William Murray and children and Mrs. Bledie Crayton and children have gone to Russell for a stay of two weeks.

Mr. and Mrs. Dave Kohn of Greenville and Miss Kohn of Orangeburg spent Sunday in the city with the O. Gelberg family on Main street.

Fast Farmer, formerly of Anderson but who is now making his home at Gainesville, Fla., spent Sunday in the city.

Dr. and Mrs. McCallis of Starr were shopping in the city Saturday.

R. R. Doyle of the Lebanon section was among the visitors to spend yesterday in the city.

Mrs. W. C. Scott of Piedmont has arrived in the city for a visit to friends.

L. W. Campbell of near Belton was in the city for a few hours yesterday.

E. W. Harper, Jr., of Lowndesville spent part of yesterday in the city.

J. R. Corbett of Williamston was among the visitors to spend yesterday in the city.

Phil Jenkins of Hendersonville, N. C., is visiting friends and relatives here.

G. A. Hoag of Atlanta was here yesterday, a guest at the Chiquita hotel.

Glenn Simpson of Starr spent yesterday in the city on business.

Walter Robinson has returned from Hendersonville, N. C., where he has been spending a few days.

John Flynn of Spartanburg spent yesterday in the city with friends.

J. C. Pruitt, a well known citizen of Starr, was in Anderson yesterday.

Miss Lillie Chapman has returned to her home in Denver section, following a visit to Anderson.

J. F. McClure, a well known traveling man with headquarters in Anderson, is here for a few days.

Mr. and Mrs. Albert W. Anderson and Mrs. Hugh Page and Mr. and Mrs. Foster McKissick of Greenwood, form a congenial party who are motoring through the mountains of North Carolina.—Augusta (Ga.) Chronicle.

Mr. J. R. Whitlow is detained in Asheville on account of the illness of his children who are quite sick with diphtheria.—Greenwood Journal.

Cost Kept Down—Quality Kept Up. No better medicine could be made for coughs, colds, croup, hoarseness, tickling throat, bronchitis, etc., than Foley's Honey and Tar Compound.

That's why they can't improve the quality and war or no war, the price remains the same. E. J. Sargent, Dallas, Tex., says: "I believe Foley's Honey and Tar has no equal for it completely relieved me of all symptoms of tuberculosis and my cough has entirely disappeared." Don't accept any substitute for Foley's Honey and Tar is the best. Evans' Pharmacy Agents.

A NEWSPAPER'S MISSION. Josephus Daniels Says That It Is To Educate the People.

Vergennes, Vt., Sept. 7.—Subordinate the printing of the news to the service of the country, especially when international issues are involved and the times are fraught with peril, was the counsel of Josephus Daniels, secretary of the navy, to the American editors and publicists as expressed here tonight before the Vermont Press association. Mr. Daniels declared no editor could be patriotic who permitted his love for sensation or his zeal in printing news to lead to the publication of something that might embarrass his government in diplomatic relations with another.

"The duty of the press is to be critical, but always accurate," the secretary said. He emphasized the responsibilities of the editor, but asserted his duty was first that of a citizen.

Acute Indigestion. "I was annoyed for over a year by attacks of acute indigestion, followed by constipation," writes Mrs. M. J. Gallagher, Geneva, N. Y. "I tried everything that was recommended to me for this complaint but nothing did me much good until about four months ago I saw Chamberlain's Tablets advertised and procured a bottle of them from our druggist. I soon realized that I had gotten the right thing for they helped me at once. Since taking two bottles of them I can eat heartily without any bad effects." Sold by all dealers.

NOTICE OF SALE OF REAL ESTATE. Pursuant to power granted to me by virtue of a deed of trust executed July 31st, 1913, by John R. Smith, C. C. Smith and Mattie Smith, as the sole surviving heirs-at-law of Caroline Smith, deceased, I will sell at public outcry, to each between the usual hours of sale on the first Monday in October, 1914, for the purposes set out in the aforementioned trust deed, the following described real estate formerly belonging to the said Caroline Smith, deceased: All that tract containing forty-two acres, more or less, situate in Fork township, in the county of Anderson, in the state of South Carolina, adjoining lands of South Hill church, J. J. Fretwell and others; it being the same conveyed to the said Caroline Smith by deed from J. A. Coker, dated March 29, 1895, of record in the office of the clerk of court for Anderson county, state of South Carolina in Book LLL, page 214. Purchaser to pay for deed.

C. F. Harrison, Trustee. Tues. Sept. 1-4 Tues.

Advertising in a Good Medium Pays Handsomely. THIS IS A GOOD MEDIUM

LIVE STOCK WISDOM.

Growing lambs for mutton is a paying business independent of the wool crop.

A small drink of water at first after coming in from the field all sweaty, then more later, when the animal has cooled off somewhat, is better than to permit too heavy a draft at once.

It pays in hard cash to keep the sows healthy and hearty, both before and after farrowing.

The lambs should be put in a good pasture and given grain in a wide trough. One or two dry ewes should be left with the lambs to keep them quiet.

Many a horse has been made sick and not a few have died from eating a little green clover when the body was too warm or in some other way out of order.

At this time of year the place for the pigs is in the pasture. The shelters must be kept in good order.

CRUELTY TO LIVE STOCK CAUSES LOSS

Cruelty in handling and loading hogs and carelessness in overcrowding cars by shippers in sending such stock to market are evils which are costing pork producers of the northwest large sums every month and the effects of which are accentuated by hot weather.

Commission dealers, packers and the stockyards authorities at South St. Paul have joined in the campaign being made at all of the principal packing points of the country to bring about a humane reform.

At the stockyards the use of prodding poles, clubs or other appliances for beating animals in driving them to and from the pens has been forbidden and all employees cautioned against abusive treatment of all kinds of stock.

Packers who found themselves obliged to discriminate against farmers or shippers who offered stock showing the effects of abuse because

The corner is shown in the illustration holds 7000 bushels of corn and cost \$1000, says the Iowa Homestead. There is no wood in it save the frame about the de openings and a trap in the center of the crib which is used to empty the crib rapidly when desired. There is a small circular air shaft in the center of the crib about three and one-half feet in diameter and made of the same square tiling of which the walls of the crib are made. Through this square opening about two inches wide in this tiling the air enters freely. The tile is so set that the opening rises toward the center and this keeps out much of the rain and snow.

The well known fact that fresh green grass and carrots increase the yellowness of butter, the only standard by which the average person judges its richness. On the other hand, a large proportion of these pigments is deposited in the body fat and elsewhere in the cow. When the ration is changed to one containing fewer carotins and xanthophyll constituents, this hoarded store is gradually drawn upon, and in consequence the yellowness of the milk does not diminish so rapidly as it otherwise would. This yellowness increases, however, the instant the necessary plant pigments are restored to the ration.

Green grass is probably richer in carotins than any other dairy feed. Cows fed on it will, therefore, produce the highest colored butter. Green corn, in which xanthophyll constitutes the chief pigment, will also produce a highly colored product. On the other hand, a ration of bleached clover hay and yellow corn is practically devoid of yellow pigments, and the milk from cows fed upon it will gradually lose its color. It is, of course, indisputably true that the breed does influence the color of the milk fat, but vary the ration and there will be a corresponding variation in the color of the milk fat in each breed.

In cows of the Jersey and Guernsey breeds the body fat is frequently of such a deep yellow color that some butchers and consumers look with disfavor upon beef from these breeds. For this prejudice there is absolutely no justification. The yellowness of the fat springs from the same causes as the yellowness of the milk fat, and there is no reason for objecting in one case to the very thing that is prized in the other.

Remedy For Eczema in Cows. A cow that has eczema should have a full dose of epsom salts as a physic, to be followed with half ounce doses of hyposulphite of soda given twice daily in feed. Bathe the affected parts of the body with a 1-100 solution of coal tar dip, to keep the flies from bothering her. Make alfalfa hay only a part of the ration and as soon as possible substitute grass.—Farm Journal.

Potatoes For Cows. When not too expensive potatoes may be fed to cows in limited quantities. They should be chopped or sliced and fed raw, twenty pounds being about as large a daily allowance as a cow should receive. Excessive amounts may cause scours and very often a poor quality of milk is produced by cows receiving a large portion of potatoes.—Hoard's Dairyman.

Concrete Barn Floor. In finishing the surface of a concrete barn floor the use of a steel trowel should be avoided except in gutter and manger, as a smooth, slippery surface is not desirable elsewhere. The surface should be finished with a wooden float, which produces a fluted, easily cleaned and one giving a good foothold for stock.

Salt For Sheep. In a French sheep experiment some years ago one lot got no salt, one one-half ounce each per day and one three-fourths ounce each per day. The first ran 134 days, all sheep getting the same feed, and results showed that the sheep that had salt cut 15 pounds more wool than those that had no salt and the wool was of better quality; also the sheep that got salt made better gains than those without salt. It pays to salt regularly.

DAIRY and CREAMERY

Color is Largely Determined by Breed Characteristic and Feed. [Prepared by dairy division, United States department of agriculture.]

That the rich yellow color demanded by the public in dairy products is primarily due to the character of the cow's feed is demonstrated by recent experiments carried on by the United States department of agriculture in co-operation with the Missouri state experiment station.

Chemical tests show that the yellow pigment in milk consists of several well known pigments found in green plants. Of these the principal one is carotin, so called because it constitutes a large part of the coloring matter of carrots. The other yellow pigments in the milk are known as xanthophylls. These are found in a number of plants, including grass, but are especially abundant in yellow autumn leaves.

These pigments pass directly from the feed into the milk. This explains

Why Butter is Yellow.

The corner is shown in the illustration holds 7000 bushels of corn and cost \$1000, says the Iowa Homestead. There is no wood in it save the frame about the de openings and a trap in the center of the crib which is used to empty the crib rapidly when desired. There is a small circular air shaft in the center of the crib about three and one-half feet in diameter and made of the same square tiling of which the walls of the crib are made. Through this square opening about two inches wide in this tiling the air enters freely. The tile is so set that the opening rises toward the center and this keeps out much of the rain and snow.
